## 公司介绍 Company Profile

### About us

Shandong Leap Group Limited established in 2011,main export pharma packing material and food additive.

We have our own cooperative factory in Shandong and Jiangsu,they have passed ISO9001:2008 international quality management system certification and 9 packaging registration certificates approved by China and Drugs Administration(CFDA).

After years of efforts,due to stable quality,efficient after-sale service and good reputation,our products had been exported to many countries.

Looking to the future,we will continue to uphold the management idea of "Quality and Service,more than anything else",to provide you with better packing material and your need products.

## 产品目录 Product list

### Pharma packing

- ◆ Blister Foil
- ◆ Alu Alu Foil
- ◆ Strip Foil
- ◆ Suppository Laminated Foil
- ◆ Lidding Foil
- ◆ Aluminium Foil Laminated Paper
- ◆ PVC / PVDC

## Blister foil-PTP (OP/AL/HSL)

PTP blister foil heat sealing  
strength>9N/15mm,without cutting corners or  
discounting peel strength but with sincere  
cooperation.

## Blister Foil- Alu Alu Foil

Cold form alu alu foil is the best composite plate  
of blocking performance at present with ultimate  
protection against water,oxygen and UV radiation.  
It is especially used for the high sensitive range of  
pharmaceutical and generic medicines which are  
highly hygroscopic or light sensitive.

Web: [www.sdleapgroup.com](http://www.sdleapgroup.com)

# Strip Foil

It is easy peel and convenient to carry, which is heat sealing with itself to pack products which are temperature sensitive and moisture sensitive.

## 1. AL/PE Strip Foil

## 2. PET/AL/PE

## 3. Paper/AL/PE

# Suppository Laminated Foil

Water preventing ability of suppository laminated film is 700 times higher than common plastic structure, so it brings better protection to suppositories and the appearance is more beautiful and high grade.

## 1. Suppository Shells PVC/PE

## 2. Suppository Roll

# PVC

It's a pharmaceutical packing material by rolling with the characteristics of high luster, high transparency, non-toxic, aseptic and good folding self-adhesion performance. It is widely used as visual packing of pharmaceutical products, foods, electronic, toys and tools etc.

# PVDC

It's based on the PVC rigid film, coated with better resistance material PVDC, so it has 5 times isolation capacity comparing with single-layer PVC rigid film. As one type of blister packaging, it had better barrier property and prevent the medicine from getting moist and oxygenate and thus extend the medicine quality guarantee period. With characteristics of excellent processability, high water vapor and oxygen barrier, low content of vinyl chloride monomer, low content of readily oxidizable substance, superior dimensional stability, widely used in food, military and pharmaceutical packing.
